1) KNO_3 ;
2) KNO_2 ;

The diagram illustrates a two-stage experimental design. Stage 1 includes a 'Pre-Test' and a 'Post-Test' for a 'Control' group. Stage 2 also includes a 'Pre-Test' and a 'Post-Test' for a 'Control' group. The flow is indicated by arrows, showing the progression from Stage 1 to Stage 2.

1200 - 1205 - 1210

A schematic diagram of a two-dimensional lattice. It shows a grid of points with horizontal and vertical bonds. A central point is labeled 'i'. A path of points is highlighted, starting from 'i' and moving horizontally to the right, then vertically upwards, then horizontally to the left, and finally vertically downwards, forming a closed loop. The path is labeled with 'i' at the starting point and 'i' at the ending point, indicating a return to the starting point.

1. The first part of the paper is a review of the literature on the topic of the paper. It starts with a general overview of the field and then moves on to a more detailed discussion of the specific issues that will be addressed in the paper. This section is intended to provide the reader with a clear understanding of the context in which the research is being conducted.

Figure 1

6. 1999, 1998, 1997

1. The first group of authors (e.g., [1, 2]) considers the problem of the stability of the motion of a system of particles in the case of a small perturbation of the initial conditions. The problem is solved by the method of the variation of constants. The results are obtained in the form of a series in powers of the perturbation parameter. The first group of authors also considers the problem of the stability of the motion of a system of particles in the case of a small perturbation of the initial conditions. The problem is solved by the method of the variation of constants. The results are obtained in the form of a series in powers of the perturbation parameter.
